patients, societies current approach towards AIDS patients etc. On 1st December the question was, 'should our country spend some of our resources on HIV patients & its treatment or is the investments by some donors and few government policies will be enough?'. 2nd question was, 'Compared to senses in 2005 there were 50% increase in adolescents AIDS, is it happening due to lack of knowledge or lack of sexual education?'. Next day we had another question that is, 'Is our society is a factor that the AIDS patients feel guilty of telling others about their illness'. The fourth question was 'is HIV a self-testing disease'. And the last question was 'do you think the age patient should be separated from our society'. We had a wonderful response for all these questions which was asked regarding our commenting section on Facebook. It helped to change many of the wrong perspective about AIDS. Moreover, it helped to create an awareness about AIDS. We got a huge participation for our commenting section. Everyone found the campaign so interesting and informative.
